CLAIM AMENDMENTS

Please amend the claims so that the currently pending claims read as follows:

1. (Currently Amended) A method of providing automated vehicle diagnostic function within a mobile vehicle communication system, comprising:
configuring a primary diagnostic script for a telematics equipped mobile vehicle wherein the primary diagnostic script recreates known problem sequences when executed;
providing the primary diagnostic script to the mobile vehicle;
executing the primary diagnostic script; and
collecting diagnostic data based on the executed primary diagnostic script.
2. (Original) The method of claim 1, further comprising:
analyzing the collected diagnostic data.
3. (Original) The method of claim 1, further comprising:
initiating the automated vehicle diagnostic function.
4. (Original) The method of claim 3, wherein initiating the automated vehicle diagnostic function comprises:
receiving a request for automated vehicle diagnostic function from a user interface; and
identifying diagnostic routines based on the received request.

5. (Original) The method of claim 1, wherein configuring the primary diagnostic script comprises:
determining at least one diagnostic script based on diagnostic options;
and
retrieving the at least one determined diagnostic script,
wherein one or more diagnostic scripts are combined into the primary diagnostic script.

6. (Cancelled)

7. (Original) The method of claim 1, wherein the primary diagnostic script triggers data capture when specific conditions exist.

8. (Original) The method of claim 1, wherein collecting diagnostic data based on the executed primary diagnostic script comprises:
receiving diagnostic data from vehicle system modules; and
storing the received diagnostic data.

9. (Original) The method of claim 1, wherein the diagnostic data is selected from the group consisting of: diagnostic trouble codes.

10. (Currently Amended) A computer readable medium storing a computer program comprising:
- computer readable code for configuring a primary diagnostic script for a telematics equipped mobile vehicle wherein the primary diagnostic script recreates known problem sequences when executed;
 - computer readable code for providing the primary diagnostic script to the mobile vehicle;
 - computer readable code for executing the primary diagnostic script;
- and
- computer readable code for collecting diagnostic data based on the executed primary diagnostic script.
11. (Original) The computer readable medium of claim 10, further comprising:
- computer readable code for analyzing the collected diagnostic data.
12. (Original) The computer readable medium of claim 10, further comprising:
- computer readable code for initiating the automated vehicle diagnostic function.
13. (Original) The computer readable medium of claim 12, wherein the computer readable code for initiating the automated vehicle diagnostic function comprises:
- computer readable code for receiving a request for automated vehicle diagnostic function from a user interface; and
 - computer readable code for identifying diagnostic routines based on the received request.

14. (Original) The computer readable medium of claim 10, wherein the computer readable code for configuring the primary diagnostic script comprises:
computer readable code for determining at least one diagnostic script based on diagnostic options; and
computer readable code for retrieving the at least one diagnostic script, wherein the one or more diagnostic scripts are combined into the primary diagnostic script.

15. (Cancelled)

16. (Original) The computer readable medium of claim 10, wherein the primary diagnostic script triggers data capture when specific conditions exist.

17. (Original) The computer readable medium of claim 10, wherein the computer readable code for collecting diagnostic data based on the executed primary diagnostic script comprises:

computer readable code for receiving diagnostic data from vehicle system modules; and
computer readable code for storing the received diagnostic data.

18. (Original) The computer readable medium of claim 10, wherein the diagnostic data is selected from the group consisting of: diagnostic trouble codes.

19. (Currently Amended) A system for providing automated vehicle diagnostic function, the system comprising:
- means for configuring a primary diagnostic script for a telematics equipped mobile vehicle wherein the primary diagnostic script recreates known problem sequences when executed;
 - means for providing the primary diagnostic script to the mobile vehicle;
 - means for executing the primary diagnostic script; and
 - means for collecting diagnostic data based on the executed primary diagnostic script.
